✓ **My Safety Promise**

- ☐ I will always detect with a grown-up
- ☐ I will fill in every hole I dig
- ☐ I will never touch broken glass, needles, sharp metal, batteries or anything that could be dangerous
- ☐ If I find something like that, I will tell my grown-up straight away
- ☐ I will only pick up litter that is safe to hold
- ☐ I will keep my exact find spots private and use a nickname

Litter We Removed

Detectorists help keep the countryside tidy. A grown-up handles anything sharp or unsafe. Tick the safe litter you took home:

- ☐ Ring pulls and bottle tops
- ☐ Silver foil
- ☐ Other safe litter

Sharp or unsafe items. Leave broken glass, needles and sharp metal to a grown-up.

For Grown-Ups

This journal is for supervised fun, roughly ages 8 to 13. Always detect with permission on safe, legal ground. Keep children away from sharp or hazardous objects, and stop for anything that could be ordnance, human remains or a significant archaeological group: do not touch, move away and, for ordnance or weapons, call the police. See the free "Metal Detecting With Children" full safety guide before you go.
